

HANOVER, 28. Jan 2014 - With only a few months in existence, startup pixolus stood their ground against more than 60 competing companies in CeBIT's "Start me up" competition. The team of computer vision experts develops software for visual data capture using smartphone cameras. During CeBIT, they will present their app for capturing data from meter readers.

A person is sitting on a light-colored sofa, holding a white tablet. The tablet screen shows a colorful abstract graphic with geometric shapes and patterns. The person is wearing a blue and white striped long-sleeved shirt. The background is a bright, out-of-focus interior space.
